Roundarch Isobar
300 East Randolph
Chicago, IL 60601 USA

To Whom It May Concern:

I am applying for the position of Full-Time Software Developer at Roundarch Isobar for Summer 2013 in Chicago. I came across the job posting on my university's internal career posting website Careerbuzz.

I am interested in this company because I feel that I can bring a large, relative skillset to the company. As a graduating senior from the Georgia Institute of Technology computer science program, I have a unique set of skills. I am not only well versed in various programming languages that Roundarch utilizes, but also in their theory and application and how to attack a given problem utilizing any available tools. In this sense, I am not a Java developer or database developer, but a software developer. I have worked in all levels of the software stack, from front end user experience design, to backend database design, this makes me suitable for any portion of software development. I feel like Roundarch is a good fit for me. Roundarch designs applications with a user experience as the highest priority, a policy that I too attempt to uphold.

I would like to request an interview with Roundarch to move forward with this job application. I am completely flexible on interview times and locations. If there are any questions, I can be reached by phone at 404-550-2251 or by email at vishnurajeevan@gmail.com Thank you for taking the time to consider my application for this position at Roundarch.

Sincerely yours,

Vishnu S. Rajeevan
